

Why use ArcTitan?

ArcTitan is a cloud based email archiving solution which can be easily set up to allow you to securely archive your organisation's emails and simply retrieve archived emails. ArcTitan complies with all major regulatory standards including HIPPA and Sarbanes Oxley.

Security

ArcTitan allows you to rest assured that your email has been securely archived. The solution offers a robust cloud based email archive built on AWS, which allows encrypted archiving and audited access to email.

The solution is compatible with all major mail servers and includes automatic updates and backups.

Simplicity

ArcTitan's clear user interface guarantees easy use when archiving and retrieving archived emails. ArcTitan ensures hassle free compliance with all major regulatory standards such as Sarbanes Oxley and HIPAA.

Violation of industry regulations can result in expensive fines - save yourself the money and hassle by trialling ArcTitan for free for 30 days.

Functionality

ArcTitan is simple to set up and manage while being incredibly feature rich. The solution offers customizable role management, active directory integration, a full reporting suite and automatic backup.

ArcTitan provides a much more feature rich archiving solution than the archiving function built into Exchange and integrates seamlessly.

Emails archiving vs. Email back-up

There's no comparison between email archiving and having your email backed-up. Email back up via PST files offers a top level view, can be resource intensive and cumbersome to search and retrieve emails.

Email archiving on the other hand offers a more comprehensive approach, allowing full visibility of all archived email, quick search and retrieval of emails and more granular control. A cloud based solution such as ArcTitan reduces your organisation's onsite data footprint

Product features

Cloud based

ArcTitan is a cloud based email archiving service deployed for you on AWS. The cloud based solution allows you to spare internal resources and reduces your company's onsite data footprint, while guaranteeing the same level of security as an on premise solution.

Secure

ArcTitan guarantees secure email archiving by ensuring all passwords are hashed and encrypted, supporting TLS encryption, scanning for viruses, offering active directory integration and basic authentication.

Role management

ArcTitan offers granular control by allowing the administrator to create different roles and assign these roles to the end user. This allows the administrator to control what level of access the end user has and whether or not they have the permission to delete archived emails.

Legally compliant

The solution is legally compliant with Sarbanes Oxley, HIPPA and all major regulatory standards. Legal compliance is essential in highly regulated industries such as health care, banking and education, failure to adequately archive your email can result in hefty fines.

Compatible

ArcTitan is compatible with all major mail servers and email services such as: Microsoft Exchange 2000/2003/2007/2010/2013, message attachment stubbing, Access archives from within Outlook (requires plugin), can use Multiple Exchange servers, can use Multiple Exchange stores, Google Apps, Lotus Notes, Zimbra, AXIGen, Postfix, Communicate Pro, Neon Insight, Sendmail, Qmail, iMail and more.

Reporting

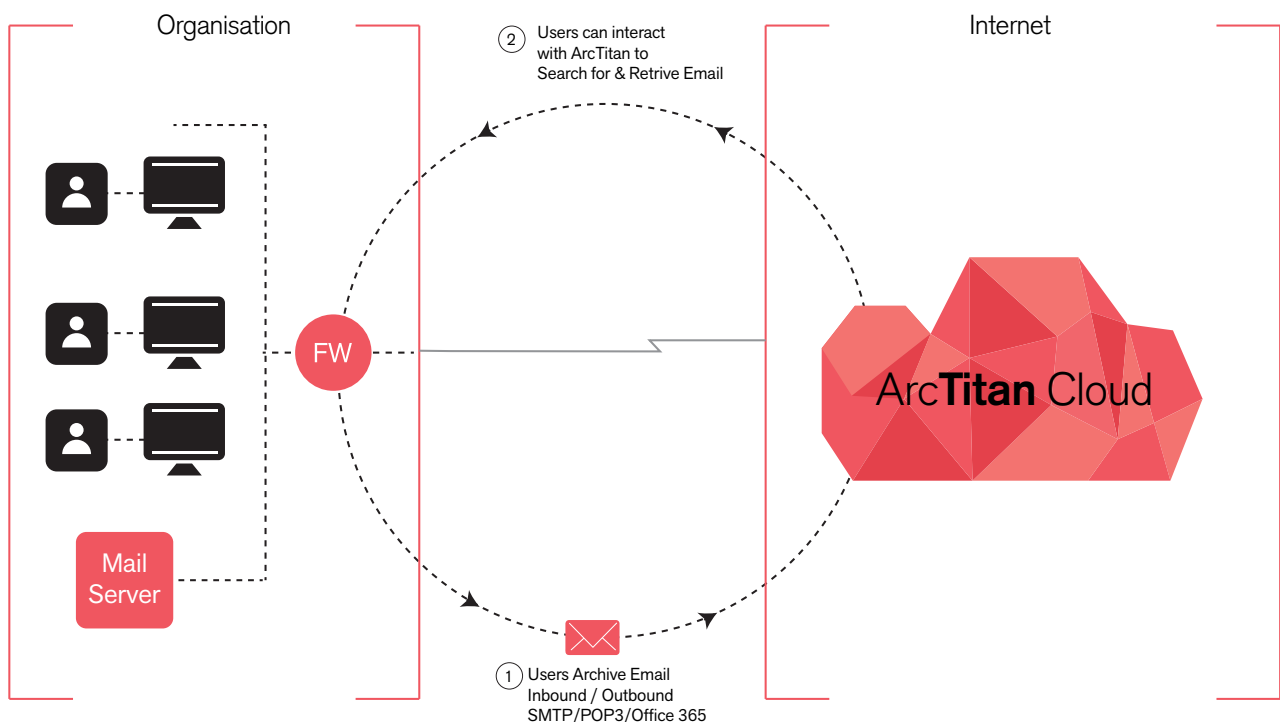

ArcTitan's reporting suite allows for automation of searches, which can be scheduled and delivered by email. There is also an extensive journal reporting as PDF or TIFF.

Scalable

ArcTitan can be easily scaled to suit your needs. The cloud based solution returns almost instant search results: searching 30 million emails takes less than a second, almost instant archiving: more than 200 emails archived a second. ArcTitan scales to over 60,000 users.

Centralized administration

ArcTitan can be securely accessed online which allows the administrator to easily manage the solution remotely.

SpamTitan Cloud technical specifications
